CERTIFIED TOOL & GRINDING

Certified Tool & Grinding has been manufacturing and reconditioning cutting tools since 1975. Back in those days, you needed a good craftsman with a manual-grinding machine. Times have changed... Today, our skilled craftsmen operate five 5-Axis CNC Cutter Grinding Machines, as well as a battery of special, manual machines.

Smaller Manufacturer - Big Service

Being a smaller manufacturer enables us to provide personal service. We can *specialize your tools*, making small adjustments in the geometries that will help your tools cut better, usually at a standard tool price. Our *tooling engineers* will work with you to design the best tool for your special application. Our goal is to increase your productivity while lowering your tooling costs.

Highest Quality Materials: We use the highest quality sub-micron grade, hot isostatically pressed tungsten carbide available from only the most reputable domestic sources.

Large Inventory of Tools On Hand: We carry a large inventory of new domestic standard and ball nose cutters, as well as many other cutting tools for immediate delivery.

Increase Wear Resistance: We have "in-house" *deep cryogenic treatment systems* as well as partner sources for many wear resistant coatings, such as TiC, TiCN, TiN, TiALN and ALTiN.

Resharpener Services: We can sharpen ALL your metal working tools; endmills reamers, drills, stepdrills, milling cutters, and countersinks. Ask about our tailored Resharpener programs and how they can maximize your tool life & increase your profits.

Resharpener High Performance Drills: Certified is licensed for Resharpener Hertle, Sumitomo, Guhring, and other high performance drills. We promise much better turnaround compared to the OEM while maintaining extremely high quality.

Safe, Reusable Tool Packaging: New and sharpened cutting tools are packaged in reusable containers to protect them during transit and storage. They are much safer to handle than the old fashioned dip-wax.

Local, Friendly Service: Certified manufactures our tools right here in the Miami Valley, so you can talk directly to the people making your tools and... *keep your buying dollars in the region where you live.*

Place a trial order today, we guarantee your satisfaction on all tools!
